# Entry into operation AES-RO and NCTS5-RO systems for exports and transit operations Postponed again until March 11, 2024, and May 15, 2024

### AES-RO and NCTS5-RO systems for exports and transit operations go live date postponed again until March 11, 2024, and May 15, 2024

### Amendments in brief:

The Romanian Customs Authority (AVR) has postponed the implementation of the AES and NCTS5 customs systems, initially planned for December 1, 2023. Consequently, export customs procedures will now utilize the new AES-RO system, while the NCTS5 RO system will be used for transit declarations. Economic operators need to register in AVR's UMG Trader platform to access these systems. Their operationalization was initially postponed to February 12 (AES) and March 4, 2024 (NCTS5) and has now been extended to March 11 and May 15, 2024.
